Juspion

The main hero of the series, Juspion is an orphan raised by Eijin, until he embarks on his quest to fight the MegaBeasts and defeat Satan Goth. His Metal-Tech suit is made from the very rare galactic mineral Ejinium and grants superhuman capabilities to its owner.

Daileon

Based from the silver Super Planetary Battleship Daileon, Juspion travels across worlds to pursue Satan Goth. When facing a rampaging MegaBeast, Juspion converts Daileon into the Super Planetary Combat Giant Daileon to defeat MegaBeasts with its Cosmic Crash double punches.

Mad Galant

The son of Satan Goth. Juspion's antagonist throughout the series, he is capable of fighting him with his sword (similar to Juspion's). He wears a reminiscent black Metal-Tech suit similar to Juspion's and can take on human form.

Satan Goth

Satan Goth's objective is to create a MegaBeast Empire in the galaxy and rule it from the Planet of the MegaBeasts. Originally a giant pupil stage resembling a cross between Darth Vader and Megatron, in the endgame arc, Satan Goth reaches the peak of his power and molts to become Great Satan Goth.
